

## THE EXPECTED ASIAN INVASION

by Craig Bradshaw. Senate candidate One Nation WA  
3/4/10

**Over 10 years ago Pauline Hanson warned of an Asian invasion Of Australia. She was attacked by parliament and the multiculturalists lobby, hounded out of politics for asking the questions many Australians wanted our politicians to answer, even falsely imprisoned on false charges.**

Recently, research consultancy company ACIL Tasman revealed that in the next 10 years Western Australia will receive over 520 000 migrants with 300 000 of those from Asian countries.

That sounds like a government sanctioned invasion to me!

No doubt big business will be rubbing their grubby hands together at the thought of all that slave labour and increased profits from sales of substandard consumer products.

Union leaders should be shaking in their collective boots at the prospect of a wave of cheap labour, drop in membership and the disgust that their Australian members will feel for them for not doing something about this destruction of the Western Australian workplace.

We already have Asian street gangs which appear to be ignored by the police and the media.

Every crime where a person can be alleged to have some possible or imaginary link to a motorcycle club is claimed to be "Bikie Related", but silence from our politicians and inept police force when it is Asians that peddle the drugs to our young people and the intimidation they inflict on their own ethnic communities. Do we want this disgusting crime to expand as it will with an increased number of Asian gang members? We may have to turn to the motorcycle clubs for our protection if the police continue to hide and thereby facilitate ethnic crime.

As the number of various Asian communities press for control of society we will see the type of racial and religious violence common throughout Asia and the resulting destruction of the Anglo-European civilization so desired by most of the world.

If I wanted to live in an Asian community I would move to Asia, but I don't and I will fight to protect this marvellous Anglo-European nation from the financial and cultural attacks being inflicted on Australia.

Your support for One Nation Western Australia will go a long way in protecting the life we have built and enjoy to continue.
