

# “Carbon tax”

the globalist  
financial conspiracy  
that robs the poor  
and rewards the rich!

## Fact Box

Politics is about  
consensus.

Science is about testing  
a hypothesis.

Globalism is about the  
few mixing politics and  
science and getting rich  
quick at your expense.

Because it simply isn't a pollutant, a tax on carbon dioxide cannot "cut pollution" as the Greens and the Gillard government spin doctors claim.

Carbon dioxide is a rare, 0.039% by volume, colourless non-toxic natural trace gas which is exhaled from the lungs of all animals. It is part of the cycle of life. Without it, there would be no plants or animals on land or in the sea.

A carbon tax is nothing but a penalty that will reduce asset values, share prices, profits, dividends and the growth rate of our biggest companies. It will destroy jobs and eat away at community savings. It cannot "protect the economy" as Julia Gillard claims. It is a negative that puts Australia at a disadvantage to the rest of the world - robs the poor and middle classes and rewards the rich few.

Money taken from the pockets of ordinary Australians will make the friends of Labor and the Greens who are backing power schemes like inefficient and expensive wind and solar energy very rich. And make you very poor - very fast!

Using carbon tax receipts to buy votes from pensioners, retirees, families, tax payers, carers, students and tenants is simply electoral bribery that will never compensate for job losses, reduction in retirement nest eggs, and increased living costs for everyone.

Al Gore and the globalist carbon trading financial manipulators, not ordinary people, are the winners here - it's just that Labor and the Greens have been conned by the Globalists and even now are too silly to work it out.

One Nation is a party of climate rationalists  
interested in hard science - not ideology.
