

# “Why Australia must VALUE ADD”

## Fact Box

- To grow wealth and jobs a nation must value add.
- The community that takes more than it gives is doomed to poverty.

The Gillard/Brown government thinks it can grow Australia and produce more jobs by increasing debt, borrowings and idiotic new taxes like the carbon tax - a tax on air! It thinks it can retain power by buying the votes of increasingly financially squeezed Australians with cynical handouts of their own money.

As Greece, Ireland, Italy, the USA, the UK and a host of other countries have already discovered the hard way, you cannot borrow your way to prosperity. The era of the credit bubble which appeared to drive economies forward is over. What went up is now going down - a natural process.

Only efficient, modern, high tech manufacturing industries can truly value add to a developed nation's wealth - ask Germany.

Most Australians are struggling as prices soar in our two speed economy and if the mining and gas industries dive we'll be no better off than Greece - a basket case.

There is only one solution... And it is not the welfare state!

***Toss out Labor and the Greens,  
Revive our manufacturing industries  
- or end up in the dark ages!***

One Nation is a party of realists interested in real solutions - not ideology for ideologies sake.
