

PRIMARY INDUSTRY & RURAL DEVELOPMENT

One Nation will protect our primary industries from deregulation, native title claims and withdraw from international treaties which put us at a disadvantage.

Our aims include:

- Stringent Quarantine and Custom requirements.
- Tariff protection in line with reciprocal trading partners, to offset foreign subsidised competition.
- Re-regulate, to create efficient marketing agencies to maximise returns.
- Encourage farm forestry.
- Research into by-products utilization and value adding.
- Australian products promotion and content identification of all products.
- Urgent measures and financial support to reverse salinity. • Better infrastructure.
- Environmental sustainability.
- Population decentralisation.
- Government Bank with local branches.
- No privatisation of water.
- No majority foreign ownership of Australian land or resources.
- Curb investment speculations which drive up the price of land.
- Public Assets are not for sale.
- Regulated and uniform fuel prices to reduce costs.
- Promote tourism.
- No Genetically Modified Organism (GMO).

Australia's rural and regional communities are key contributors to our economy. We cannot afford losing their input and their skills. Without them, we would not stand a chance in times of crisis. One Nation firmly believes that a thriving rural and regional sector is vital for Australia's economy and its future.
